

LMI RISKCOACH

A valuable resource for
Insurance professionals

Why RiskCoach?

As an insurance professional, understanding occupations and their exposures is critical when it comes to identifying your client's insurance needs.

However, acquiring such specialist knowledge can be an impossible task for busy professionals, particularly given the vast number of industries involved... let alone trying to remain up-to-date with new risks as industries and processes change with developing technologies.

The benefits

LMI RiskCoach has been designed to enable insurance professionals to better understand the risks associated with various industries.

This online tool systematically analyses the insurance risks associated with a particular industry for each major insurance product line, providing it to you in a format you can share with your customers.

7,000 Industries, 14 Classes of Insurance

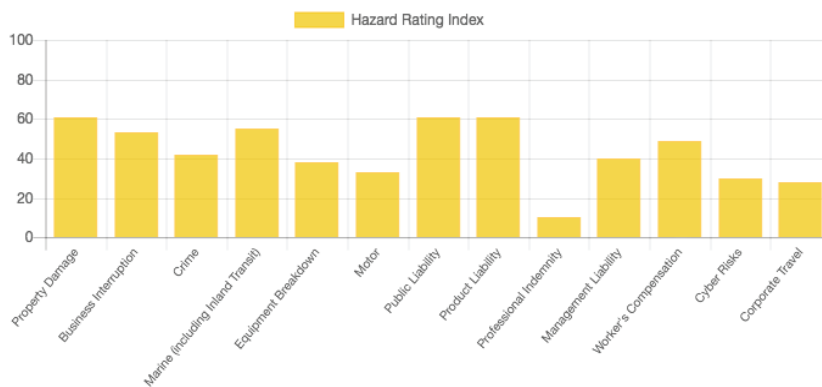

-  **Property Damage**
-  **Business Interruption**
-  **Crime**
-  **Marine (including Inland Transit)**
-  **Equipment Breakdown**
-  **Motor**
-  **Public Liability**
-  **Product Liability**
-  **Management Liability**
-  **Professional Indemnity**
-  **Worker's Compensation**
-  **Cyber Risks**
-  **Corporate Travel**
-  **Product Recall & Contamination**

Understanding the Risk

Understanding Risk leads to reduced Risk

The system boasts a wide range of features to assist the experienced professional through to the new staff member and helps them understand new industries and continue with their professional development.

For each completed industry, both a short-form summary, Hazard Index and a full Risk Assessment are available, together with background information on services and process, risk checklists and short courses. The site includes the following research content and information, plus much more.

RiskCoach OnTheGo

FREE for subscribers

Generate and send a tailored client risk report in minutes

All industries hazard index, significant exposures and risk checklist at your fingertips

What Industry do you want to see?

While there is research content, including a full Risk Assessment, available for upwards of 7,000 occupations and activities. Research is ongoing with new industry groups being populated and released on a regular basis.

We welcome all subscribers to contribute their own expertise to the knowledge database and to nominate any industries you would like prioritised via online User Feedback.

Additional Features

1

Training tools to facilitate both the up-skilling of new staff members and support for the more experienced professionals who may be unfamiliar with a specific risk issue.

2

Calculator tools, including a building value estimator, under-insurance calculator, and limit of liability calculator.

3

The Vault, which enables subscribers to customise content for their organisation and share company technical information.
